Saturday, 10 March 2018 01:00 - Last Updated Thursday, 22 March 2018 00:00

If you have been to the Kingfisher Bar recently you will have discovered that **we now have Free WiFi installed,**

This is one of the key improvements that we said we would deliver this year and after a lot of hard work in persuading a vendor to connect us to the network we are now online. The wifi code is available from the Bar team and it will allow us to make further enhancements to the club in due course. For those of you without cash in your pockets, **we can now also take card payments.**

Our next piece of work is taking place later this week with a digger appearing in the car park to **improve the drainage**

and to fix the issue we had with flooding last year. Look out for further news on improvements coming soon!
